Activity 2

Usability Evaluation of the NWU Student Portal

Learning Objectives

At the end of this activity, the students should be able to:

1. Evaluate the NWU Student Portal using appropriate usability factors and measures.
2. Identify usability strengths and problems encountered while performing common tasks in the portal.
3. Justify their evaluation using appropriate ratings, observations, and screenshot evidence.
4. Recommend appropriate improvements based on the identified usability problems.

Instructions:
Access and use the **NWU Student Portal**. Perform common student tasks such as viewing information, navigating between sections, or accessing available student services.

Evaluate the portal based on the following factors:

Evaluation Factor	What to Evaluate
Effectiveness	Can students successfully and accurately complete the intended tasks? What difficulties or errors occur?
Efficiency	How much time and effort are required to complete common tasks?
Satisfaction	How easy, comfortable, and satisfactory is the portal to use?
Consistency	Are similar terms, actions, layouts, and navigation elements used consistently?
Reliability	Do features and actions work as expected without failure? Can students depend on the portal to perform its intended functions?
User Experience	What is the overall experience of using the portal?

For each evaluation factor:

1. **Rate the portal from 1–5**, with **5 as the highest**.

2. **Provide a brief justification** for your rating based on your actual experience using the portal.
3. Provide **screenshot(s)** from the portal as evidence to support your evaluation.
4. Give **one recommendation for improvement**, if applicable.

Grading Rubric

Criteria	0 pts	4 pts	7 pts	10 pts
Usability Evaluation	No submission	Evaluation is incomplete or shows limited understanding of the factors	Most factors are evaluated appropriately with minor issues	All factors are evaluated accurately and demonstrate clear understanding of usability concepts
Justification & Analysis	No submission	Ratings have unclear or weak justification	Ratings are generally supported by relevant observations	Ratings are clearly and logically justified based on actual interaction with the portal
Evidence & Recommendations	No submission	Screenshots or recommendations are mostly missing or unrelated	Appropriate evidence and recommendations are provided for most factors	Relevant screenshots support the evaluation, and appropriate improvements are recommended
Completeness & Organization	No submission	Several required parts are missing or poorly organized	Most required parts are complete and organized	All required parts are complete, clear, and well organized
